

Potrzebne dodatkowo
przy montażu

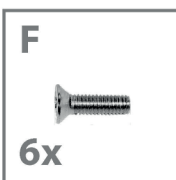

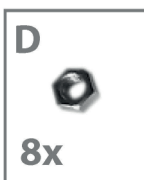

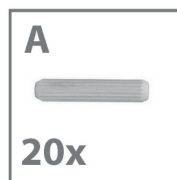

Elementy łóżka

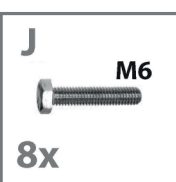

elementy góry zagłowia

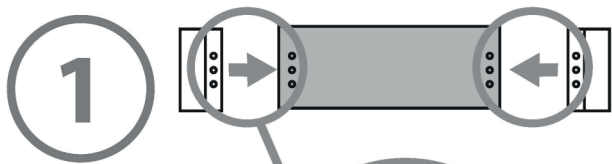

Elementy łączące

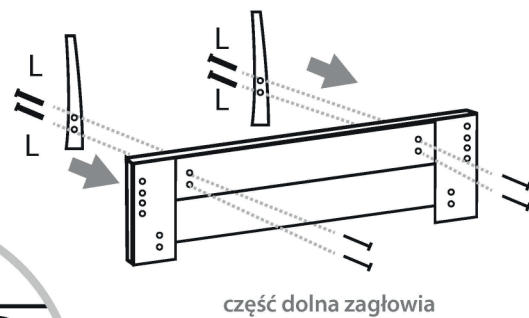

kołek drewniany

Podczas skręcania łóżka zachowujemy najwyższą staranność, a wszystkie śruby dokręcamy z wyczuciem do momentu kiedy zaczynają stwarzać wyczuwalny opór.

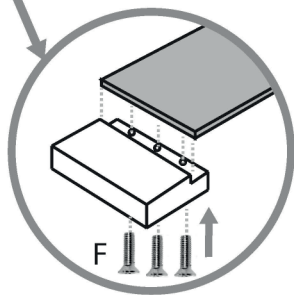

2

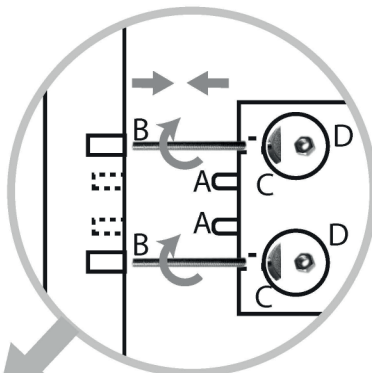

część dolna zagłowia

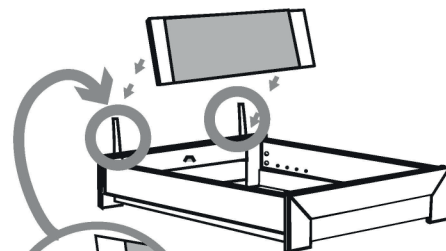

3

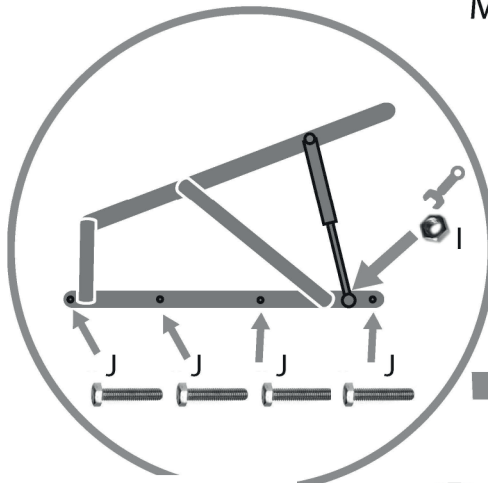

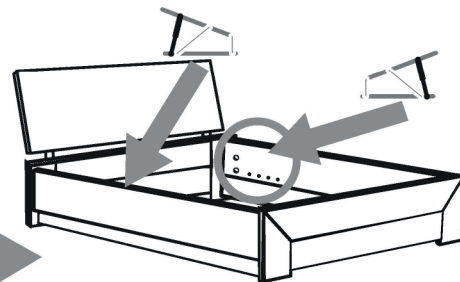

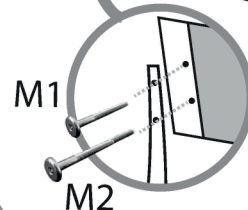

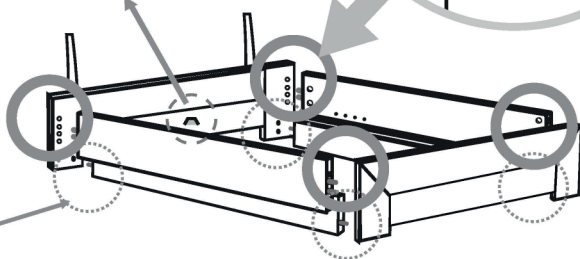

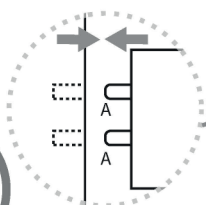

przy łóżkach
120/140/160/180/200

4

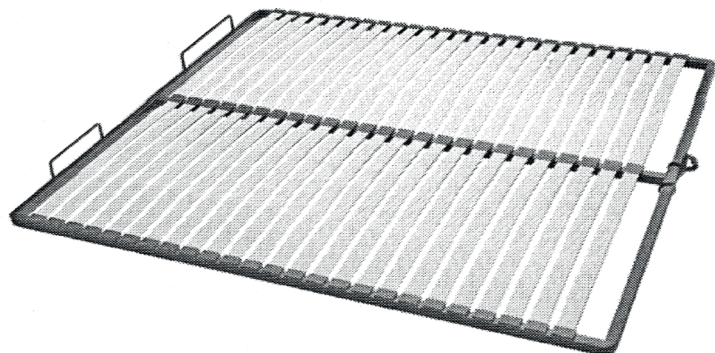

5

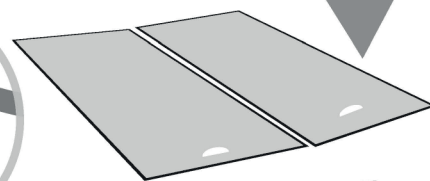

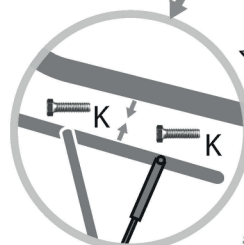

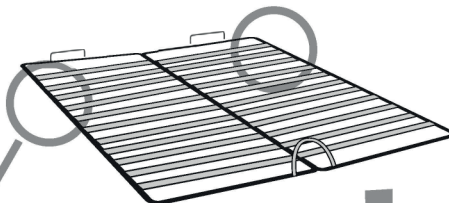

W łóżkach z otwieraniem
bocznym otwory do
mocowania trójkąta
z siłownikiem znajdują się
w zagłowiu i zanózku

6
